An exclusive residential development and clubhouse enclosed by dense planting enclosed by dense planting with views across a lakeside park.

Planned as a luxury, low density cluster, this 9ha Green Cove development is buffered from the surrounding roads and urban districts by dense tree planting and community gardens. Jogging paths meander through forest, gardens and around the lake which forms the centerpiece of the Cluster.

A lakeside timber deck and events space forms the starting point for a dramatic boardwalk which leads across the lake to the Clubhouse. The whole complex benefits from stunning lakeside views. The roads through BSD Green Cove are designed to give pedestrians and cyclists priority over vehicles; each junction is a Shared Space, with exceptionally high quality materials and a distinctive identity.
