A small luxury villa complex sensitively integrated into the rugged coastal landscape of East Bali.

Sited on a remote part of the East Bali coast, Tulamben Resort Villas is a self-contained oasis. The four luxury villas are carefully sited to maximize privacy and ocean views. Each has its own swimming pool and stunning garden. The complex incorporates a sports and tennis court, boat house, children's playground, lap pool and administrative buildings, all set within a sustainable landscape of native palms, trees, shrubs and local seasonal grasses.

The formal geometry of the walkways, buildings, terraces, ornamental pools and gateway planting contrasts with the natural infrastructure and boulder-strewn streams and gullies which are a feature of this steep, rugged coastline.
