A landmark sustainable development with a dynamic landscape setting

An extensive lagoon is the centrepiece for this 3.5 ha high technology lifestyle complex which is designed to provide a peaceful, green sanctuary, away from the bustle of the city.

The masterplan aims to provide a place for - health, play, socialising, entertainment, connectivity and business. It includes appartments, a shopping mall and offices amidst extensive parklands with a sequence of walkways, terraces, viewpoints and play areas which surround the lagoon. In the centre of the lagoon, the design of the shaded viewing terrace is inspired by the form of a lotus flower. It is sited in accordance with the principles of feng shui.
