design team

Forrec (Masterplanning - Earlier Phase)

This landscape masterplan for an exclusive mixed development establishes high standards and creates a distinctive, memorable identity.

The 280 ha Alam Sutera Phase 2 is an extension of the successful Phase I development adjacent to the Jakarta - Merak toll road.

The arrival sequence begins at the dedicated toll road junction which is enclosed by a dense plantation of lowland forest. The main roads leading into the development are sheltered by a palm avenue from which there are views and connections to a sequence of plazas, parks and malls. Informal planting along stream corridors frames natural linear parks which thread through future residential areas and contrast with the more formal forecourts and gateways to the core commercial developments. A large lake forms the centerpiece and focus for views from the Alam Sutera Mall.
